

of earth & sky 28 march - 1 april

Spectacular. Original. Evocative. Don't miss these two works inspired by old and new stories in this theatrical fusion of dance and visual arts.

Commissioned by Bangarra's Artistic Director, Stephen Page, *of earth & sky* features the work of celebrated choreographer Frances Rings and the talented Daniel Riley McKinley. *Artefact* by Frances Rings, is inspired by the dynamic between 'man and object'. It honours Indigenous symbols of ancient and modern rituals that hold great spiritual meaning and connection to place.

Riley by Daniel Riley McKinley, explores the cultural resilience of Indigenous Australians. It is a celebration of the life of Aboriginal photographer and film maker, the late Michael Riley, and his internationally acclaimed *cloud* photographs.

At the heart of Bangarra's work is the inimitable soundscape and musical creativity of David Page, one of Australia's most successful Aboriginal contemporary composers.
